EDUCATION SOLUTIONS

Students deserve a learning environment designed with their success in mind.

Many of our current schools have substandard fluorescent lighting which leads to reduced focus and increased eye strain. This lighting is less efficient, requires more maintenance, and is often times not bright enough for students' needs.

Sitler's LED Supplies can custom tailor a lighting solution to address these issues.

Our lighting experts have helped more than forty school districts convert to LED lighting, with many more to come.

"We've had savings up to \$650 per month since the installation on our electric bill!"

**Carmen Benson,
Business Manager
Winfield Mt. Union Comm. School District**

IMPROVED LEARNING

LED lighting systems provide brighter, more natural light. This reduces eye strain and improves focus in students.

More natural lighting allows for brighter, more accurate color in art class, and better observations in science class.

Studies have also shown that brighter, more natural light improves attention and overall mood in students, especially during dark winter months.

LED BENEFITS

LED lighting is designed to provide quality lighting with minimal service. By switching your benefits will include:

- **Improved Lighting Quality**
- **Reduced Eye Strain while Reading**
- **Improved Focus**
- **Significantly Reduced Maintenance**
- **Reduced Energy Usage**

WHY SWITCH

With ever shrinking budgets, reducing utility and maintenance costs are paramount. LED lighting eliminates the most common failure points of fluorescent lighting while saving energy and money.

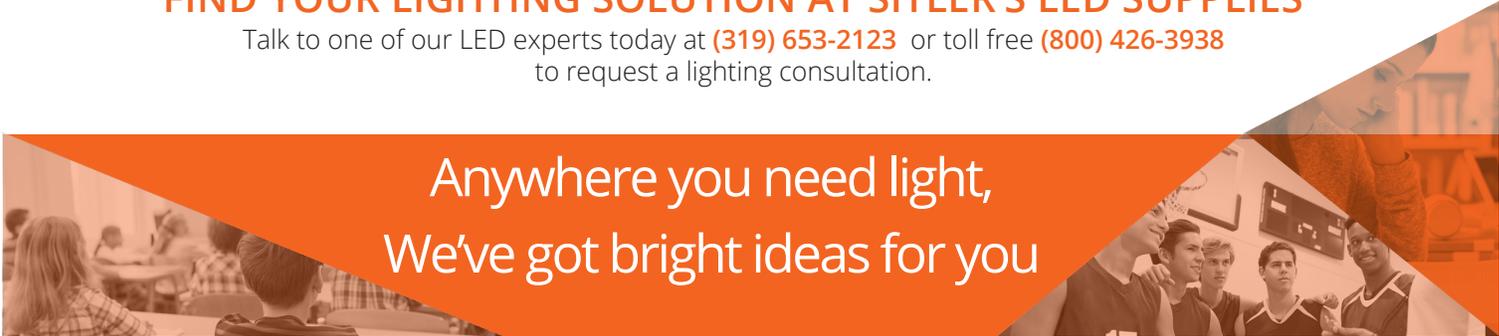

In addition to classrooms, LED's are an ideal solution for gyms, cafeterias, offices, libraries, and parking lots.

Outdoor LED lighting improves imaging on security cameras and provides a safer nighttime environment.

Sitler's partners with contractors around the state helping you get your lighting project finished in an efficient and timely manner with minimal disruption.
