ONCE Agriculture Animal Specific Lighting Technology

once[™]
innovations inc

Agricultural Lighting

Recent research has found that lighting has a significant effect on Swine and Poultry performance. Swine and Poultry are highly influenced by the amount and type of light they are exposed to.

ONCE focuses on the science of light by creating lighting products specifically and exclusively for the Agricultural market. ONCE lighting systems are species-specific and establish lighting as a proven input to increase production.

ONCE MLS, MLM, Slave, and Master DIMMER benefits:

- Productivity enhancement
- Energy savings
- Built for your barn
- Animal welfare
- Easily retrofitted into existing fixtures

Barn LED Lighting

Swine finishing barn – NE Iowa

Sitler's LED Supplies 319.653.2123 - Premier Ag Systems 563.245.9000

Testimonials

“The Once Lights and the team at Sitler’s have exceeded our expectations. The light quality, durability and customer service from the Sitler’s team has not disappointed and we value our business relationship with them.

Our customers have been very pleased with the lights and electricians like the simplicity of installation.”

Matt Cunningham – Owner/Partner, Premier Ag Systems

“The Once lights in our barn that we built in 2016 have been very durable and trouble free. The light quality in the barn is superior to the other LED lights we have built in our barn built in 2015.”

Jesse and Jordan Landsgard
